

# Abdulaziz Alghamdi

Cybersecurity Engineer — Software Developer — AI/ML Specialist

Phone: +966 50 006 5661 Email: [azizcsecj@gmail.com](mailto:azizcsecj@gmail.com)

Website: [aziz707.info](http://aziz707.info) GitHub: [github.com/AzizAlghamdi](https://github.com/AzizAlghamdi) LinkedIn: [abdulaziz-alghamdi-525810360](https://www.linkedin.com/in/abdulaziz-alghamdi-525810360)

Location: Riyadh, Saudi Arabia

## Professional Summary

Recent Computer Science graduate specializing in cybersecurity and software development. Experience building production applications, conducting security assessments, and developing AI-powered analysis tools.

## Education

### Bachelor of Science in Computer Science

University of Colorado at Colorado Springs

2021 – 2025

Cybersecurity Specialization, Criminal Justice Minor

GPA: 3.1/4.0

## Technical Skills

**Programming Languages:** Python, C++, Java, JavaScript, TypeScript, C#, Go, Rust, SQL, Bash, PowerShell, HTML5/CSS3

**Cybersecurity:** Penetration Testing (VAPT), SIEM (Splunk, QRadar), Wireshark, Metasploit, Nmap, Burp Suite, Kali Linux, Incident Response, Threat Intelligence, Threat Hunting, Digital Forensics, Malware Analysis, Vulnerability Assessment

**Security Frameworks:** NIST Cybersecurity Framework, ISO 27001, CIS Controls, OWASP Top 10, IEC 62443, GRC

**Development:** Full-Stack Development, Django, React, Flask, Node.js, Express.js, RESTful APIs, GraphQL, Microservices

**AI/ML:** TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, Computer Vision, Anomaly Detection, Pattern Recognition

**Databases:** PostgreSQL, MySQL, MongoDB, Redis, Firebase, Database Design, Query Optimization

**Cloud & DevOps:** AWS (EC2, S3, Lambda), Azure, Docker, Kubernetes, CI/CD Pipelines, Git, Jenkins, Infrastructure as Code

**Operating Systems:** Linux (Ubuntu, Kali, RHEL), Windows Server, System Administration, Network Administration

**Additional:** Blockchain Analysis, Smart Contracts, Cryptography, Network Protocols, Security Architecture, Risk Assessment

**Languages:** Arabic (Native), English (Fluent)

## Projects

### Interactive Cybersecurity Learning Platform – [aziz707.info](http://aziz707.info)

2024 – Present

- Developed educational platform with 20+ interactive cybersecurity simulations covering SOC analyst training, penetration testing labs, and vulnerability assessment techniques using Python and Docker
- Created compliance framework guides for NIST CSF, ISO 27001, CIS Controls, and OWASP with practical implementation examples
- Implemented real-time progress tracking and interactive dashboards using Django backend and React frontend

### ApplierPilotAI Platform – [applierpilot.com](http://applierpilot.com)

2025

- Built full-stack AI-powered job application platform using Django, React, and PostgreSQL with intelligent job matching achieving 90%+ accuracy through NLP and BERT models
- Deployed production application with Docker, SSL/TLS encryption, automated CI/CD pipeline, and 85%+ test coverage
- Implemented secure authentication with JWT tokens, rate limiting, and OWASP Top 10 vulnerability protection

## Research & Technical Writing

### Publications:

- Forensic Analysis of Cryptocurrency-Based Ransomware Attacks: Criminal Justice and Technical Perspectives*, 2024
- Post-Quantum Cryptography Implementation Challenges: Security Implications for Critical Infrastructure*, 2025
- Quantum Cryptography: Implications for Digital Evidence in Criminal Investigations*, 2024

## Certifications

Google Cybersecurity Professional Certificate

April 2025

In Progress: CompTIA Security+, Certified Ethical Hacker (CEH), CISSP
