Professional Summary

Saudi-based GRC consultant with hands-on delivery across financial, government, and defense sectors. Assessed and documented compliance posture for high-profile clients including American Express (AESAs), Aramco Digital, Saudi Public Security, and IMCTC — spanning SAMA CSF/MVC/CTI, NCA ECC/DCC, and ITGC frameworks. Authored 40+ bilingual cybersecurity policy documents, led regulatory walkthroughs with risk owners, and built a live GRC automation platform. Combines deep framework knowledge with rare technical depth in software development, penetration testing, and AI-assisted tooling.

Professional Experience

IT Risk Advisory Consultant

April 2026 – Present

Dr. Mohamed Al-Amri & Co. BDO – Riyadh, Saudi Arabia

- Conducting SAMA MVC & CSF compliance assessment for American Express (AESAs); supported team knowledge transfer on CTI assessment methodology
- Driving end-to-end cybersecurity and data privacy review for upsource by STC, including scoping, control testing, and gap reporting
- Assigned to classified Aramco Digital audit: identifying risk owners, coordinating stakeholder walkthroughs, and documenting control evidence across secure infrastructure
- Producing Risk & Control Matrices (RCMs) for multiple engagements, translating technical findings into executive-level compliance reports
- Performing IT General Controls (ITGC) assessments covering access management, change management, and IT operations controls
- Evaluating organizational security posture against NCA ECC/DCC, CIS Controls, and Cyber Resilience Framework (CRF)
- Participating in business continuity and disaster recovery (BC/DR) drills, observing failover and system switchover procedures

Cybersecurity GRC Specialist

November 2025 – February 2026

Sensus – Riyadh, Saudi Arabia

- Delivered full SAMA Cybersecurity Framework assessment for MedGulf Insurance, covering all domains end-to-end
- Led NCA ECC & DCC assessments for Saudi Public Security and Islamic Military Counter Terrorism Coalition (IMCTC)
- Authored and reviewed 40+ cybersecurity policies, procedures, and standards for IMCTC covering governance, access control, incident response, and data classification
- Wrote 4–8 bilingual (Arabic/English) security policy documents for Saudi Public Security aligned to NCA regulatory standards
- Delivered cybersecurity awareness program for King Abdulaziz Arabian Horse Center at Dirab
- Designed KPI tracking system to measure employee compliance progress and performance across client engagements

Independent GRC Projects & Research

May 2025 – November 2025

- Built a GRC Automation Platform integrating AI assistance to accelerate policy drafting, control mapping, and compliance gap analysis
- Developed aziz707.info: 20+ interactive cybersecurity simulations covering SOC training, penetration testing labs, and compliance framework guides (NIST CSF, ISO 27001, CIS Controls, OWASP)
- Published three research papers on ransomware forensics, post-quantum cryptography, and quantum evidence in criminal investigations

Education

Bachelor of Science in Computer Science

University of Colorado at Colorado Springs

August 2021 – May 2025

Cybersecurity Specialization, Criminal Justice Minor

GPA: 3.1/4.0

Member of Mountain Lions Cyber Club, Participant in National Cyber League competitions

Technical Skills

Regulatory Frameworks: SAMA CSF / MVC / CTI, NCA ECC / DCC / CCC, ISO 27001:2022, NIST CSF 2.0, CIS Controls v8, CST CRF

GRC Practice: ITGC Assessments, Gap Analysis, Risk & Control Matrices (RCM), Audit Walkthroughs, Compliance Roadmaps, BC/DR Reviews

Security Tools: Splunk, QRadar (SIEM), Metasploit, Burp Suite, Wireshark, Nmap, OWASP Top 10, MITRE ATT&CK

Development: Python, JavaScript/TypeScript, Django, React, Docker, Kubernetes, AWS, PostgreSQL, REST APIs

Operating Systems: Linux (Ubuntu/Kali), Windows Server

Languages: Arabic (Native), English (Native) – bilingual documentation for Saudi regulatory submissions

Certifications

Google Cybersecurity Professional Certificate

April 2025

Comprehensive program covering security fundamentals, risk management, network security, Linux/SQL, incident detection and response, and Python automation

In Progress: CompTIA Security+, Certified Ethical Hacker (CEH)

Research & Publications

- *Forensic Analysis of Cryptocurrency-Based Ransomware Attacks: Criminal Justice and Technical Perspectives*, 2024
- *Post-Quantum Cryptography Implementation Challenges: Security Implications for Critical Infrastructure*, 2024
- *Quantum Cryptography: Implications for Digital Evidence in Criminal Investigations*, 2025

Notable Projects

GRC Automation Platform

2025

- Built an AI-assisted platform to automate policy drafting, control mapping, and gap analysis workflows — reducing manual documentation effort significantly
- Integrated compliance logic for SAMA, NCA ECC/DCC, ISO 27001, and NIST CSF frameworks

Interactive Cybersecurity Learning Platform – aziz707.info

2023 – Present

- Developed educational platform with 20+ interactive cybersecurity simulations covering SOC analyst training, penetration testing labs, and vulnerability assessment techniques using Python and Docker
- Created compliance framework guides for NIST CSF, ISO 27001, CIS Controls, and OWASP with practical implementation examples
- Implemented real-time progress tracking and interactive dashboards using Django backend and React frontend

ApplierPilotAI Platform – applierpilot.com

2025

- Built full-stack AI-powered job application platform using Django, React, and PostgreSQL with intelligent job matching achieving 90%+ matching accuracy using BERT-based NLP models
- Deployed production application with Docker, SSL/TLS encryption, automated CI/CD pipeline, and 85%+ test coverage
- Implemented secure authentication with JWT tokens, rate limiting, and mitigations for OWASP Top 10 vulnerabilities
